8	Annexure B – Sample Outputs	98

1. INTRODUCTION

Water plays crucial role in the socio-economic development of the country. Safe drinking water is required for very large and growing population. Water has also become a major constraining factor for the growth of the agricultural and industrial sectors. In contrast, flooding frequently threaten populations and civil structures.

The Hydrological Information System provides information about Hydrological and Hydro meteorological parameters that vary with respect to time and space. The information is useful to the decision/policy makers, designers and researchers.

Earlier, Water Resources Department (GOM) was collecting the Hydrological Information System (HIS) Data and was recording manually in the form of registers for the use of Water Resources Department only. In 1995 National Hydrology Project was established in collaboration with Ministry of Water Resources, Government of India, CWC, CGWB, National Institute of Hydrology (Roorkee), CWPRS (Pune), CPCB, India Meteorological Department, with nine states i.e. Maharashtra, Orissa, Tamilnadu, Madhya Pradesh, Chhattisgarh, Andhra Pradesh, Gujrat, Karnataka & Kerala to develop sustainable HIS with following characteristics.

- Demand driven i.e. output is as per the users needs.
- Use of standardized equipments and adequate procedures for data Collection and processing.
- Computerized, comprehensive and easily accessible database.
- Proper infrastructure to ensure sustainability.

Under this Project since 1995, Hydrology Project (SW) Water Resources Department, Maharashtra State has started to collect the data on these lines and entering it in electronic mode. Three softwares are used for data entry, validation and data dissemination.

1. SWDES (Surface Water Data Entry System) for data entry and primary validation
2. HYMOS (Hydrological Modeling System) for secondary validation
3. WISDOM (Water Information System Data Online Management) for data storage and dissemination

The finally validated data is then given to Hydrological Data Users Group (HDUG) members online/ offline with nominal cost.

The idea of preparing and publishing water year book is to communicate the intended data users, the kind of meteorological and hydrological scenario in the basins of the state during the hydrological year under consideration. A list of stations is attached herewith (Annexure A). The intended users can have this data from data bank as per the procedure laid down. Analysis of data is illustrated basin wise and basin is the unit for presentation of this data for Maharashtra State.

This water year book contains following information of the Maharashtra State.

1. Extreme rainfall events
2. District wise average rainfall.
3. Basin wise annual Isohyets.
4. Discharges at Gauge Discharge sites

2. HYDROLOGICAL REVIEW

2.1 Basins of Maharashtra and network :

There are five river basins in Maharashtra namely Godavari, Krishna, Tapi, Narmada and West Flowing Rivers basin south of Tapi.

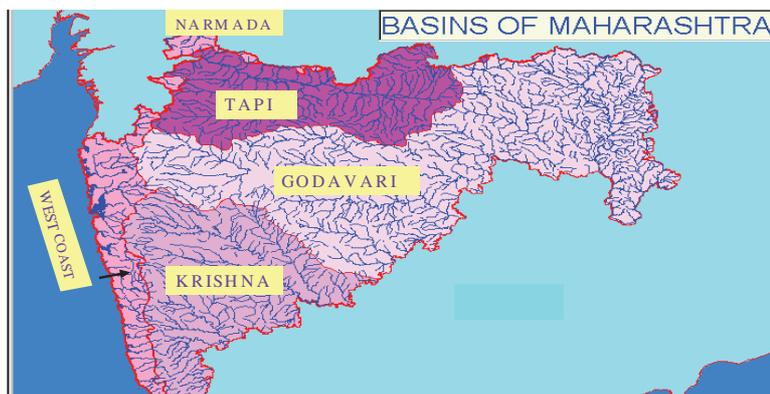

Fig 2.1 Map showing Major River Basins in Maharashtra

Table 2.1 Network of Hydrology Project: Maharashtra (HP)

S. N.	Name of Basin	ARG	SRG	FCS	GD
1	Godavari	78	94	29	73
2	Tapi	29	34	12	27
3	Narmada	-	3	-	-
4	Krishna	25	88	20	50
5	West Flowing Rivers South of Tapi	30	57	6	60
	Total	162	276	67	210

Table 2.2 Network of Hydrology Project: Maharashtra (NHP)

Sr. No.	Name of Basin	ARG	SRG	FCS	GD
1	Godavari	82	176	40	26
2	Tapi	6	14	1	14
3	Narmada	-	-	-	-
4	Krishna	6	40	25	4
5	West Flowing Rivers South of Tapi	84	135	20	10
	Total	178	365	86	54

2.2 Maximum Rainfall in Basins:

After analysing the daily rainfall data, it is observed that the maximum daily rainfall is not same as that of the previous years. Also it is observed that the maximum daily rainfall is not occurring on same station. It varies with respect to the location and period. It is also observed that yearly maximum rainfall and maximum daily rainfall is not occurring on the same station. The comparison is shown in the table given below.

Table 2.3 Comparison of Annual Maximum Rainfall and Maximum Daily Rainfall for year 2009

Sr. No.	Basin	Maximum Daily rainfall in mm		Annual Maximum Rainfall in mm	
		Station	Rainfall	Station	Rainfall
1	Lower Godavari	Kurkheda	340	Gothangaon Bori	1564
2	Upper Godavari	Karajkhed	170	Bhavalibk	1522
3	Krishna	Mahabaleshwar	480	Kitwade	6640
4	Narmada	Toranmal	65	Tornamal	938.80
5	Tapi	Semadoh	196.4	Semadoh	1525
6	West Flowing Rivers South of Tapi	Walawal	408	Amboli	5355

Table 2.4 Comparison of annual Maximum Rainfall and Maximum Daily Rainfall for year 2010

Sr. No.	Basin	Maximum Daily rainfall in mm		Annual Maximum Rainfall in mm	
		Station	Rainfall	Station	Rainfall
1	Lower Godavari	Bhamaragad	393	Bhamaragad	2694
2	Upper Godavari	Shevali	200	Bhawali	2466
3	Krishna	Mahabaleshwar	295.50	Kolik	5323
4	Narmada	Toranmal	85.0	Toranmal	1596.10
5	Tapi	Malkatar	210.0	Tarubanda	1689.0
6	West Flowing Rivers South of Tapi	Shivdav	300.0	Amboli	6701.5

Table 2.5 Comparison of Annual Maximum Rainfall and Maximum Daily Rainfall for year 2011

Sr. No.	Basin	Maximum Daily rainfall in mm		Annual Maximum Rainfall in mm	
		Station	Rainfall	Station	Rainfall
1	Lower Godavari	Warudbagaji	175.40	Hardoli	1665.20
2	Upper Godavari	Zari	296	Dongarpada	2797
3	Krishna	Kitwade	409.40	Kitwade	8162.5
4	Narmada	Sisa	80.0	Sisa	386.0
5	Tapi	Semadoh	303.0	Tarubanda	2737.0
6	West Flowing Rivers South of Tapi	Malgund	386.0	Amboli	7701.50

2.3 Following table shows comparison of average annual rainfall of Maharashtra occurred in 2009, 2010 & 2011

Year	Average Rainfall in mm
2009	1057.68
2010	1454.18
2011	1262.21

2.4 District wise yearly average rainfall:

District wise yearly average rainfall for year 2009, 2010 and 2011 over Maharashtra is shown in following table. Maximum average rainfall occurred at Sindhudurga district for year 2009, 2010 and 2011. Minimum average rainfall occurred at Nanded district for year 2009 and at Dhule district for year 2010 and 2011.

Table 2.6: District wise average Rainfall for year 2009,2010,2011:

Sr. No.	Name of District	Average Rainfall in mm (Year 2009)	Average Rainfall in mm (Year 2010)	Average Rainfall in mm (Year 2011)
1	Akola	616.4	887.97	393.47
2	Amarawati	671.4	986.86	949.57
3	Aurangabad	830.0	814.59	573.39

33	Yeotmal	586.3	1177.14	886.87

Table 2.7: Rainfall in scarcity zone for year 2009 :

Sr. No.	Name of District	Rainfall in mm Year 2009
1	Ahamadnagar	616.4
2	Akola	671.4
3	Aurangabad	695.3
4	Beed	563.8
5	Buldhana	710.1
6	Chandrapur	689.8
7	Dhule	539.0
8	Hingoli	653.4
9	Jalana	599.3
10	Jalgaon	494.8
11	Latur	557.9
12	Nanded	470.7
13	Nandurbar	722.4
14	Osmanabad	660.6
15	Parbhani	641.5
16	Solapur	604.6
17	Vardha	662.2
18	Vashim	490.1
19	Yavatmal	586.3

Table 2.8: Rainfall in scarcity zone for year 2010:

Sr. No.	Name of District	Rainfall in mm Year 2010
1	Ahamadnagar	500.30
2	Dhule	378.50
3	Solapur	405.20

Table 2.9: Rainfall in scarcity zone for year 2011 :

Sr. No.	Name of District	Rainfall in mm Year 2011
1	Ahamadnagar	500.30
2	Akola	393.50
3	Aurangabad	573.40
4	Beed	655.9
5	Buldhana	456.20
6	Dhule	378.50
7	Jalana	654.40
8	Jalgaon	469.20
9	Nandurbar	529.10
10	Osmanabad	577.20
11	Solapur	405.20
12	Vashim	439.70

Comparison of Rainfall in scarcity zone i.e. rainfall < 750mm shows that in year 2009, 19 districts were in scarcity zone; in year 2010, 3 districts were in scarcity zone and in year 2011, 12 districts were in scarcity zone. Districts, A'Nagar, Dhule and Solapur are consistently in scarcity zone.

2.5 Basin wise annual rainfall:

Following figures shows isohyets maps of Maharashtra and the 5 major basins in it for year 2009, 2010 and 2011.

3. Discharges at GD sites in various basins in Maharashtra

Maharashtra is divided into five major river basins namely Godavari, Krishna, Tapi, WFR south of Tapi and Narmada. Hydrometeorological network is spread all over the Maharashtra. There are 263 Gauge Discharge stations under the control of Hydrology Project (SW) Maharashtra.

3.1 Discharges at GD sites in Lower Godavari basin:

The catchment area of Lower Godavari Basin in Maharashtra is 81097 sqkm. There are 55 Gauge discharge stations in this catchment. Following table shows 10 years discharges for GD stations in this catchment.

NANDGUR, Area 515 sqkm						
Year	June	July	August	September	October	Monsoon Total in Mm3

4. Interpretation Of Various Statistics Presented In The Water Yearbook

Some important terms used in interpretation of various statistics are explained as follows:

4.1 Daily rainfall –Time frame of daily rainfall refers to:

All rainfall observations are made at 0830 hrs IST daily. The quantity of rainfall recorded at 0830 hrs is the rainfall of the preceding 24 hours ending at 0830 hrs of the observation day (Today's date). In other words, the rainfall of the day is the total rainfall collected in the rain gauge from 0830 hrs IST of previous day to 0830 hrs IST of the day and is recorded (entered) against today's date.

4.2 Mean Daily Runoff –The mean daily runoff is computed as follows:

To facilitate comparison between rainfall and runoff, it is usual practice to express values of rainfall and runoff in similar terms. Both may be expressed as a total volume over a specified period (in metre cube, thousand metre cube (TCM), or million metre cube (Mcum). Alternatively, discharge may be expressed as a depth in millimetres over the catchment. Volume is simply the rate in metre cube /sec (Cumeecs), multiplied by the duration of the specified period in seconds, i.e. for daily volumes in cubic metres with respect to daily mean flow Qd in cumeecs following equation may be used:

$$Vd (m^3) = (24 \times 60 \times 60 \text{ seconds}) Qd(\text{cumeecs}) = 86400 Qd (m^3)$$

Runoff depth (Rd) is the volume expressed as depth over the specified catchment area with a constant to convert units to millimeters; i.e. for daily runoff:

$$\begin{aligned} Rd(\text{mm}) &= \frac{Vd(m^3) \cdot 10^3}{\text{area}(\text{km}^2) \cdot 10^6} \\ &= \frac{Vd(m^3)}{\text{area}(\text{km}^2) \cdot 10^3} \\ &= \frac{86.4Qd (\text{Cumeecs})}{\text{area}(\text{km}^2)} \end{aligned}$$

5. Water Quality Monitoring In Maharashtra

5.1 Introduction

The Water Quality Monitoring is carried out by various agencies in the Maharashtra State viz Central Water Commission (SW), Central Pollution Control Board, Groundwater Surveys & Development Agency (GW), Hydrology Project (SW), Maharashtra Pollution Control Board, Central Ground Water Board (GW), Directorate of Irrigation Research & Development (DIRD). Hydrology Project takes care of surface water quality through sampling stations spread over the State throughout the year. DIRD monitors dug wells in the command area of major and medium Irrigation Projects. Ground Water Surveys & Development Agency also monitors the dug wells as well as ground water levels of the State intermittently.

Agency wise Water Quality Monitoring Details:

Sr. No.	Monitoring Agency	Water Quality Monitoring Sites
(A)	State	
1.	Water Resources Department, Hydrology Project (SW)	127
2.	Groundwater Surveys & Development Agency (GW)	1871
(B)	Central	
3.	Central Pollution Control Board (CPCB) (SW) through Maharashtra Pollution Control Board (MPCB)	48
4.	Central Water Commission (SW)	12
5.	Central Pollution Control Board (CPCB) (GW) through Maharashtra Pollution Control Board (MPCB)	25
6.	Central Ground Water Board (CGWB, NHNS) (GW)	803
	Total no. of stations for surface water	187
	Total no. of stations for ground water	2699

5.2 Hydrology Project and HIS

Hydrology Project (SW) aims at establishing a Hydrological Information System (HIS) in the state and the HIS includes Water Quality Monitoring of Surface Water. The basic objectives for WQ Monitoring are:

- Monitoring for establishing baseline water quality.
- Observing trend in water quality changes.
- Calculating flux of water constituents of interest.
- Control and management of water pollution.

Distribution of 127 WQ sampling locations is done amongst 5 Level-II laboratories located at different places i.e. Pune-25, Nashik-25, Nagpur-25, Aurangabad-20, and Kolhapur-32.

The WQ Sampling location category & frequency of sampling designed for SW, Maharashtra:-

WQ Sampling Location Category	Sampling Frequency upto first 3 years	After 3 years monitoring
Baseline - 50 no.	Monthly One Sample	Break for 3 years
Trend - 65 no.	Fortnightly One Sample	After classification as 'Trend' monthly one sample
Flux - 09 no.	Fortnightly One Sample	After classification as 'Flux' fortnightly one sample
Trend / Flux - 03 no.	Fortnightly One Sample	After classification as 'Trend/Flux' fortnightly one sample.

Statement showing Frequency of Sampling & Parameters to be analyzed

Station	Sampling Frequency	Test Parameters	Remark
Baseline	Once in a month first 3 years	30 parameters for 1st sample 20 Parameters for remaining Sample	After 3 years monitoring break for 3 years
Baseline after 3 years break and classification as	Once in 2 months	30 parameters for 1st sample 20 Parameters for	One year monitoring again break for 3

baseline stations		remaining Sample	years.
Trend	Twice a month	--do--	Initially 3 year monitoring
Trend (after classification as trend)	Once in a month	-- do --	Continuous monitoring
Flux	Twice a month	-- do --	Initially 3 year monitoring
Flux (after classification as Flux)	Twice a month	-- do --	Continuous monitoring with flow measurements
Reservoir and lakes (treated as Trend)	Twice a month	32 parameters for 1st samples. 22 parameters for remaining sample	Continuous monitoring

Note: - The parameters to be analyzed as mentioned above are minimal requirement. This is not however restricted. Additional parameters shall be analyzed as per the requirement or on the basis of geographical location of stations or certain circumstances.

List of Parameters

Sr. No.	Parameter 32	Parameter 30	Parameter 22	Parameter 20
1	Colour	Colour	Colour	Colour
2	Odour	Odour	Odour	Odour
3	Temperature	Temperature	Temperature	Temperature
4	pH	pH	pH	pH
5	Electric Conductivity	Electric Conductivity	Electric Conductivity	Electric Conductivity
6	Dissolved Oxygen	Dissolved Oxygen	Dissolved Oxygen	Dissolved Oxygen
7	Turbidity	Turbidity	Total Solids	Total Solids
8	Total Solids	Total Solids	Dissolved Solids	Dissolved Solids
9	Dissolved Solids	Dissolved Solids	NO ₂	NO ₂
10	Suspended Solids	Suspended Solids	NO ₃	NO ₃
11	NH ₃ -N	NH ₃ -N	B.O.D.	B.O.D.
12	NO ₂	NO ₂	C.O.D.	C.O.D.
13	NO ₃	NO ₃	Total Coliforms	Total Coliforms
14	Total Phosphorous	Total Phosphorous	Faecal Coliforms	Faecal Coliforms
15	B.O.D.	B.O.D.	Turbidity	Turbidity
16	C.O.D.	C.O.D.	NH ₃ -N	NH ₃ -N
17	Potassium K ⁺	Potassium K ⁺	Total Phosphorous	Total Phosphorous
18	Sodium (Na)	Sodium (Na)	Chloride (Cl)	Chloride (Cl)
19	Calcium (Ca)	Calcium (Ca)	Alkalinity	Alkalinity
20	Magnesium	Magnesium	Sodium	Sodium
21	Carbonate (CO ₃)	Carbonate (CO ₃)	Total Kjeldhal Nitrogen	

22	Bi-Carbonate (H CO ₃)	Bi-Carbonate (H CO ₃)	Chlorophyll	
23	Chloride (Cl)	Chloride (Cl)		
24	Sulphate (SO ₄)	Sulphate (SO ₄)		
25	Fluoride	Fluoride		
26	Boron	Boron		
27	Total Coliforms	Total Coliforms		
28	Faecal Coliforms	Faecal Coliforms		
29	Alkalinity	Alkalinity		
30	Total hardness	Total hardness		
31	Total Kjeldhal Nitrogen			
32	Chlorophyll			

It is also decided to monitor water quality testing of reservoirs, lakes considering separate issue & frequency of sampling for such locations are considered twice in a month continuously & parameters are to be analyzed 32 for the first sample in the water year (June to May) and 30 parameters for rest of the samples.

6. Data Dissemination

6.1 Introduction

In the set up of the Hydrological Information System, the first question to be addressed is the type of information to be provided. This determines the layout of the observation network (parameters, network density, observation frequency, equipment, etc.) and the data available in the databases. The type of information to be provided requires an analysis of the potential hydrological data users. The Central and State Government agencies, which support the Hydrological Information System, are the major users of the generated information. There are sources of other governmental, non-governmental and private agencies also, which make good use of this information. It is obvious that the hydrological data needs of the users also change over time. Therefore, it is very important to identify the potential data users and regularly analyse their data needs. Normally, it is expected that the hydrological information service agencies satisfy most of the genuine data needs of the potential users in particular and society at large. For ensuring an optimal use of the public resources spent for maintaining such a Hydrological Information Service, it is therefore very essential to have a proper balance between the data needs of various users and mandate of various services supporting the hydrological information system. To ensure that the HIS output remains at all times '**demand driven**' each state/agency has to constitute a **Hydrological Data Users Group** (HDUG). These HDUGs must represent all potential users within the State or intended to be covered by an agency.

Hydrological Data Users Group is a State or National Level Representative Group of current & potential large scale and repeat users of HIS data who have a stake in water resources utilization, assessment & management.

Purpose

- 1) To provide a common platform for discussion between hydrology data users & data provider.
- 2) To create awareness amongst users about Hydrological Information System (HIS) data & educate them.
- 3) To understand, analyze & update information on the changing needs of data users.
- 4) To review & recommend addition /deletion in the data collection networks related to HIS, if appropriate.

Stage discharge data is measured on GD stations. Hourly & Daily rainfall is measured on ARG & SRG stations respectively. On FCS station climatic parameters namely minimum & Maximum temperature, dry & wet bulb temperature, humidity, pan evaporation, wind direction & wind velocity, pan water temperature are measured. On water quality sampling stations water samples are collected and tested in the laboratory for turbidity, BOD, COD, PH etc.

All these data is observed either daily, twice daily or hourly & entered into computer using SWDES software. This data is then validated

using HYMOS software & after final validation, it is ready for dissemination.

Table 5.1 The extent of data availability

Sr. No.	Data Type	No. of stations	Data Availability
1	Rainfall	506	Since 1976
2	River gauge	210	Since 1980
3	Climatic	67	Since 1980
4	Water Quality	127	Since 1999

6.2 The user can request for the data as below

The HDUG member can request the data by filling the request form. (Please see Annexure-B). Data is made available online/offline through any available media such as E-mail, Floppy, CD, Tape or hard copy against payment for the required data. Catalogue services are being lunched on central NIC server, shortly and will be available on Internet.

The registration form may be downloaded from our website

<http://www.mahahp.org>

6.3 The pricing of data from date 27/06/2005

1	ARG Data.....	Rs.225 /Station/Year
2	SRG Data.....	Rs.225 /Station/Year
3	FCS Data.....	Rs.225 /Station/parameter/Year
4	GD Data.....	Rs.600 /Station/Year
5	Sedimentation Data.....	Rs.600 /Station/Year
6	W.Q.Data	Rs.240 /Station/ parameter/Year

Discounts: -

- 1 For Research or Academic purpose, 25 % of above sanctioned rates will be charged.
- 2 Individual students having no grants for research from any source, data will be supplied free of cost.
- 3 For individual farmers, 50 % of above sanctioned rates will be charged.
- 4 For Private organisations, double of the above sanctioned rates will be charged as the data is used for commercial purpose.

6.4. The members of HDUG can be

- 1 Government Institutions.
- 2 Voluntary Non Government Organizations.
- 3 Universities, Educational & Research Institutions
- 4 Associations - Farmers, Water users, Industrial
- 5 Individuals engaged in Operational Research & Development
- 6 All Professional Bodies
- 7 Consulting Representatives

DATA REQUEST FORM

The Superintending Engineer,
Data Analysis Circle,
Hydrology Project (SW)
Nashik- 422 004

Sub: Data Request Form

Sir,

The DRF is submitted herewith for the following data.

					Period		
					From	To	
1							
2							
3							
4							
5							
6							
Name:				Organization:			
Phone Number:				Email:			
Postal Address:							
Media for Dissemination *		Floppy / Hard Copy / CD / DAT Cartridge					
Format for Dissemination *		MS Access / MS Excel / CSV					
Purpose of Data *		Academic / Research / Design of Water Resource Structures / Design of Roads, Rail, Bridges etc / Navigational Purpose / Hydro Power Potential / Irrigation Management / Sedimentation / Water Quality / Other (Specify)					
Communication method for password of protected file. *		Telephone / E-Mail / Post					

* Tick ✓ Whichever is applicable

Terms and Conditions:

I / We agreed hereby to abide by the following conditions in respect of the data requested:

1. The data will be used strictly for the said purpose for which the data has been asked for.
2. The data will not be supplied to any governmental/non-governmental or public sector undertaking without the prior concurrence/fresh permission from the owner agency.
3. The data will not be published in any form without the prior permission of the owner agency.
4. The data shall not be used for commercial purpose.
5. The data will not be put on Internet or NIC Net.
6. Any inference drawn based on these data will be the sole responsibility of the Users and the Owner agency will not be responsible for any kind of loss or damage in any form occurring due to the use of data.

Please send the Demand note of data pricing at the above address by Post / Email.
